

Quality matters

The original

LINAK® products have set the standard for electric height-adjustable desks in the office furniture market. While companies may try to copy our designs, they cannot copy the details, quality characteristics and manufacturing processes born from decades of experience and a passion for excellence.

Based on decades of experience, we know why our customers partner with us:

- High quality and innovative solutions
- System reliability
- Trusted delivery/supply chain
- Knowledge and service

Only the best for everybody

LINAK® innovates continuously to improve its standard. When we innovate, we offer innovation as a standard feature available for all of our DESKLINE® customers.

Our recent innovations include the Desk Panel DPG series and our Desk Control™ Apps, which are designed for encouraging users to stand more during the day to improve their health and productivity.

With a focus on the environment, DESKLINE control boxes use ZERO™ technology, meaning a low standby power consumption, resulting in less emissions. Furthermore, most of our components are PVC-free™.

Other innovations include our Anti-Collision™ solutions such as the column-integrated PIEZO™ sensor and our external plug-in unit Desk Sensor 1. They detect furniture obstructions, then halt and reverse to avoid collision.

LINAK® offers the widest product range for electric adjustable desk systems on the market with almost unlimited options for customisation.

DESKLINE systems are true systems where everything fits – it is simply Plug & Play™. This means that columns are compatible with all DESKLINE control boxes and all DESKLINE controls – giving you optimum freedom to design.

State-of-the-art production

State-of-the-art production facilities is one of the reasons that LINAK® actuators are of such high quality. We have an extraordinarily low DPPM (defective parts per million), which is achieved with high quality components, semi-automatic state-of-the-art production, competent and experienced personnel as well as rigorous testing. All of this translates into a high-quality product. At LINAK, we focus on LEAN production, which ensures a minimum of waste. We continually optimise processes looking for new ways to improve.

To expedite delivery we have manufacturing plants in:

- Denmark
- The United States
- China
- Slovakia

Cooperating to achieve excellence

LINAK® is the supplier of electric height-adjustable desks and we specialise in everything you need to build an electric height-adjustable desk, from lifting columns, control boxes, controls and accessories such as top frames and feet. Our expert DESKLINE® teams ensure compatibility on all levels to give you a complete system from one supplier. We offer consistent speeds, excellent stability, forwards/backwards compatibility and many optional upgrades.

Our products can make up a large and essential part of a desk. We therefore strive to ensure that LINAK products complement your product and make your design possible, and to also present you with solutions rather than limitations.

We continuously work with our partners, bringing new and innovative ideas to the marketplace. By keeping engineering close to production, we easily implement new ideas and realise a quicker time to market.

5-year warranty

As the leader in actuator technology, we have established a five-year warranty for manufacturing defects on all our DESKLINE® products. As a market standard, there is 12-month warranty on batteries.

We use high-quality components, state-of-the-art production, and the most demanding testing standards in the industry to achieve excellent quality. This results in our extraordinarily low DPPM (defective parts per million).

Because quality matters
