

Choose an adjustable bed

Seven reasons that will improve your life

[LINAK.COM/HOMELINE](https://linak.com/homeline)

LINAK® 
WE IMPROVE YOUR LIFE

LINAK[®] — your partner

Linear actuator movement might be the simplest movement in the world. And yet, perfecting something simple is one of the hardest challenges.

Since LINAK[®] founder Bent Jensen came up with the idea for the first electric actuator in order to help a friend in a wheelchair, every engineer and specialist employed by LINAK has aimed to solve real-life challenges for real people.

To this day, our motto; 'We Improve Your Life' is reflected in everything we do. Whether we engage in product development, operation or implementation of technology, we always look for ways to make it easier for our customers to enter into in collaborations and partnerships with us and to ultimately improve the lives and working conditions of end users.

Our solutions move people – their work and their lives.
We Improve Your Life!

Adjustable beds are for everybody

No matter who you are, what you do, your age, health or where you are in life, an adjustable bed will make your life more comfortable – all with just a push of a button.

Ann-Kathrin Hallenslev,
Product Manager
HOMELINE®, LINAK®

“Most people think that an adjustable bed is only for elderly or sick people. But as soon as they experience the extra comfort they don’t want to miss it. This is not only because of the improved sleeping comfort, but also the extra features such as under bed light, intuitive hand controls, app use or smart home integration.”

**World-
wide
service**

Relax

Just want to finish the next chapter of a good book before going to sleep? Or maybe you are browsing for the next vacation?

Relax and enjoy it all in a comfortable position with a firm back support and your feet up – all it takes is a push of a button.

Make your mornings special

Sleep til noon, and convert your bed into a cosy brunch lounge – it only takes a few seconds.

Raise the back of your bed to avoid having to stack extra pillows for back support.

works with
Ok Google

Improve routines

A smart home is much more than just talking to devices through a voice assistant – it is pure comfort.

With our LINAK voice control solution that supports Ok Google and Google Home, the bed can be connected to a wireless network and adjusted with voice commands.

Just imagine going to bed saying a simple voice command, and then the light is automatically dimmed, the front door is locked, and the bed gently lowers the back to your favorite sleep position.

All without lifting a finger.

Find comfort during pregnancy

Aching joints and extra pressure on the lower back from the weight gain.

A pregnancy can be quite an exhausting affair. Sometimes sleep feels impossible and getting in and out of bed can become a struggle.

Adjust the leg support or backrest to achieve the comfort needed to sleep and rest.

Have bonding moments with your child

Whether you are nursing your newborn or reading a bedtime story, comfort is essential.

Day or night, you need to be able to find a comfortable position. Elevate the leg support and raise the backrest of your adjustable bed to make this moment the very best time of the day for both you and your child.

Stop the snoring

Maybe you know the situation? Your partner snores and keeps you awake all night.

You can help yourself and your partner – even without waking them up!

One way to reduce snoring is to adjust the backrest to ease breathing – often as little as four inches is enough.

Raise the backrest and go back to sleep.

Put your legs up after exercise

Allowing your body to recover after exercising is just as important as the exercising itself.

There are many benefits of elevating your legs, and the adjustable bed makes resting and recovering both easier and more comfortable.

Why you should choose a bed with a LINAK® system

1 Under Bed Light

Whatever your age, the dimmed Under Bed Light will guide and help you get safely out of and back into bed at night.

2 Wireless hand controls

All adjustable beds powered by LINAK® actuators come with wireless hand controls. Convenient and cable-free.

3 Your smartphone, your hand control

Download our Bed Control™ app to your mobile device, and use it for adjusting your bed.

4 Voice control your bed

Hands-free control, home automation, voice recognition, always up to date and high attention to privacy. The LINAK solution has it all and then some. Perfect for that extra comfort, and usefull for elderly people and people with disabilities.

5 Tried and tested technology

We have a very extensive test centre for electric actuators in the world. Every product is carefully tested before leaving the factory. LINAK® has developed and manufactured actuators since 1976 – we know that high-quality movement solutions require thorough testing.

6 Low sound level

It goes without saying that sound plays a key role. LINAK® dual actuators are some of the most low-noise actuators on the market, allowing you to adjust your bed at night without waking up your partner.

7 Low energy consumption

The LINAK® ZERO™ technology ensures an energy consumption as low as 0.1 W in standby mode. Apart from reducing your power bill, it helps minimise the CO₂ footprint of your movement solution significantly.
