**LINAK<sup>®</sup>**   
WE IMPROVE YOUR LIFE

# Full functionality, battery power and comfort for mobile applications

---

Electric adjustment of stretchers means improved ergonomic working conditions for health care personnel.

At the same time, it increases the patients' comfort.

LINAK® provides a system solution for stretchers, bed trolleys and other mobile applications.

Manufacturers are now facing endless opportunities to add functionality to mobile applications.

LINAK columns, actuators and strong battery solutions are technically optimised for this particular feature.

# Options and advantages with the LINAK® COBO system solution:

---

- **Ergonomic working environment**  
for health care personnel via height adjustment of the stretcher.
- **Increased comfort for patients**  
via electric functionality.
- **Many electric functions**  
of the stretcher as it is possible to use up to 6 actuators in the system.
- **Freedom of choice**  
between a LINAK **battery** or another battery source for the COBO system.
- Full electric functionality benefits as the system provides **audio signal when charging is needed**. This helps ensure that the stretcher is up and running all the time.
- **Possible to add an emergency stop button**  
for use in case of emergency.

# LINAK® offers system solutions

---

Our solutions have been developed and tested as systems.  
This ensures the functioning and the safety of our systems.

## System example:

---

### **COBO Connection Box**

The COBO connection box allows connecting the control unit (CU20) with a large battery source.

### **CU20 Control Unit**

The CU20 control unit is a microprocessor solution. It holds up to six channels for actuators.

### **BAJL Li-Ion\***

The LINAK BAJL Li-Ion battery has 2.25 Ah or 4.50 Ah. It is possible to use other battery sources, if needed.

*\* If any and all of the Li-ion batteries built into LINAK products are found to be defective under warranty, LINAK will provide a new product to the OEM. LINAK explicitly disclaims all other remedies. LINAK shall not in any event be liable under any circumstances for any special indirect punitive incidental or consequential damages or losses arising from any incident related to the inherent risk of thermal runaway in the Li-ion cell and any use of LINAK products. Moreover, LINAK explicitly disclaims lost profits, failure to realise expected savings, any claim against our customer by a third party, or any other commercial or economic losses of any kind, even if LINAK has been advised of the possibility of such damages or losses.*

### **BL1 Column**

The BL1 column is a recently developed three-part column in a nice aluminum design.

### **HB80 Handset**

The HB80 handset is the latest hand control developed by LINAK. The HB80 is developed with a focus on design and hand grip. The HB80 can be personalised via a customised front cover.

### **LA31 Linear Actuator**

The LA31 actuator is a very quiet and powerful actuator. It is an ideal choice for stretchers.

### **LA40 Linear Actuator**

The LA40 high performance actuator for leg and back rest functions. It comes in IPX6 as standard and a wide range of safety features can be chosen.
