Introduction

The Under Bed Light (UBL2) provides a powerful light with a good distribution. The UBL2 is to be used for beds within hospitals, nursing homes and in homecare.

The Under Bed Light makes it easier for patients and other people in need of care to find their way at night in the dark to prevent falling accidents and to make them feel safe.

Combined with a LINAK hand control and OpenBus™ control box, the Under Bed Light system offers the following advantages:

- Available with different light intensities, dimming and multicolour options (RGB)
- IPX6 or IPX6 Washable DURA™
- UBL2 has two ports, making it easy to add to existing systems without adding extra ports in the CB
- Several UBL2 products can be mounted in series
