**LINAK® information about EU Directive 2011/65/EU and Directive 2015/863 (RoHS)**

To LINAK customers,

Directive 2011/65/EU was amended by Directive 2015/863. This restricts the use of 10 substances: lead, mercury, hexavalent chromium, polybrominated biphenyls, and polybrominated diphenyl ethers, DEHP, BBP, DBP, and DIBP. All of these substances are restricted to a maximum concentration of 1000 ppm. The maximum concentration of cadmium permitted is 100 ppm.

LINAK confirms that its products are in compliance with the EU RoHS Directive 2011/65/EU and Directive 2015/863.

While some LINAK products may contain one of the restricted substances above the threshold, these instances are covered by valid exemptions listed in Annex III.

LINAK closely monitors changes in the RoHS Directive and updates its products and related documentation accordingly.

Should you have further questions, please contact [chemicalcompliance@linak.com](mailto:chemicalcompliance@linak.com).

Best regards

LINAK A/S
